

ControllerCom SMS/GSM COMMS MODULE

INTRODUCTION

ControllerCom is designed to provide SMS/GSM reporting of logged data and remote programming for ControlMate electronic pressure controllers. The unit can be fitted to any Wessex / Palmer controller with has a CX connector in place. The operator has the benefit of versatile set-up options to suit different applications.

- SMS reporting of logged data
- SMS programming message to Controller
- GSM data communication at programmed time windows

A range of external battery packs is available to allow the anything up to full 24-hour instant access.

ControllerCom connected to ControlMate

BENEFITS

Remote access

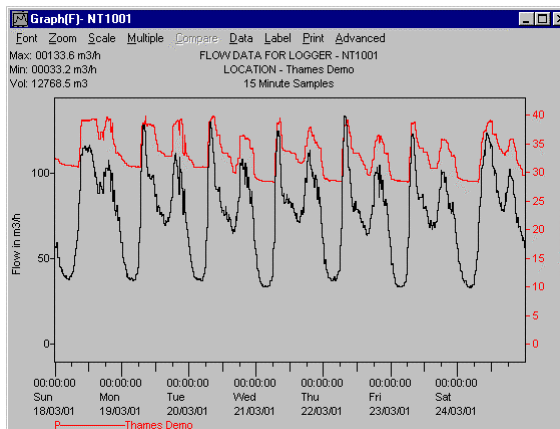

Expensive and time-consuming site visits are avoided with access to all logged data and control settings from a central PC.

Levels of Access

External battery pack options ensure the flexibility to offer exactly the level of access required for each site situation. From economic daily or weekly reporting of data, to full 24 hour immediate call up access.

Alarms

Alarms can be set for remote alerts giving the ability to examine and react instantly to site events.

SCOPE OF SUPPLY

ControllerCom comprises a single IP 68 unit with 10-way milspec connector to ControlMate and detachable antenna.

This unit provides 5-year battery life with daily reporting of logged data via SMS, together with a single time window for programming access to ControlMate.

Options.

Optional additional external battery packs are available where real time GSM access is required.
